

# A Fresh Approach to Patient Care

The Titus TLF is uniquely engineered to deliver a more uniform vertical laminar flow than competitive models. Designed for healthcare and laboratory spaces, the TLF offers easy access for maintenance and cleaning. TLF exceeds the requirements for laminar diffusers in ASHRAE Standard 170-2013, and is available in aluminum, 304, and 316 stainless. Titus offers a full range of air distribution equipment for critical applications, from laminar flow and radial diffusers to fan filter units for use in cleanrooms.

For details about the TLF, visit [www.titus-hvac.com/TLF](http://www.titus-hvac.com/TLF)  
or download the Titus AR mobile app and scan this ad.
