Check if provided.

Grommet Seal

Custom Color

General Description

- The TITUS Model TAF-G is designed for the use in access floor systems.
- The TAF-G allows "through-the-floor" power/data/phone cable access.
- All Components are constructed of a high impact polycarbonate material designed to resist damage from traffic.
- Material complies with UL-94 standard for flammability.
- Architecturally appealing face complements TITUS diffuser Model TAF-R and is available in standard light gray or black color. optional colors may be specified to match any building interior's scheme.
- The TAF-G installs into the same trim ring and mounting ring as the TAF-R.
- The trim ring's extra wide flange is designed to prevent carpet from pulling away from the grommet.
- The quick mount under-floor ring is designed for rapid compression fit installation in raised floor panels.
- With the grommet installed in the floor panel, relocation to another zone is simply done through relocating the floor panel.
- Grommet can be installed after flooring and carpet installation is complete.
